The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/656,718	Applicant(s) MILLER ET AL.	
	Examiner Anabel M. Ton	Art Unit 2875	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The indicated allowability of claim 1 is withdrawn in view of the newly discovered reference(s) to Fuke et al in further view of Szymanek. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fuke et al (6,011,929) and further in view of Szymanek (4,891,737).

3. The recitation "a track light" has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

4. Fuke et al discloses a reflector (2) extending along the length of said tube and having angularly disposed portions proximally joined at an apex on an optical axis of symmetry, said angularly disposed portions having distal edges(end portions of 2);a first

and second light controlling member fixed to the edges of the reflector one light source positionable along the length of the tube between the reflector and first light controlling member, emitting light through the first and second light controlling member generally perpendicular to the length of the tube. Fuke does not specifically recite the first and second light controlling members being a diffuser and a lens. Szymanek discloses a light controlling system for a light fixture, having a lens body 11 extending between the diffuser and a potential light source, the lens extending between the distal ends of the diffuser. It would have been obvious to one of ordinary skill in the art at the time the invention was made for the first and second light controlling members of Fuke to include a lens and diffuser, respectively, for the advantages as taught by Szymanek.

Allowable Subject Matter

5. Claims 2-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The subject matter of claims 2 and 3 is not taught by the prior art cited of record. Claims 4-10 are allowable because of their dependency.
